# Investment Instructions:

## 1. Login to Your Account

## 2. Go to Investments

- Open the Service Navigation Menu and select from Investments option

## Understanding the Investment Options

- In the Investments section, you will find two primary options:
  - **Staking:** Staking involves locking up a specified amount of cryptocurrency to earn rewards or interest over time. This option is typically used for users who want to generate passive income on their cryptocurrency holdings. Staking can vary based on the cryptocurrency you hold and its respective rewards.
  - **Bundle Plans:** Bundle plans allow you to invest in a diversified package of cryptocurrencies. This plan is ideal for users who want exposure to multiple assets without managing them individually. Bundle plans combine multiple cryptocurrencies in a single investment, potentially reducing risk and increasing return opportunities by spreading the investment across several assets.
